FOX KNIVES

HEADQUARTERS & MANUFACTURING PLANT

Dopo una lunga esperienza nella produzione e nella commercializzazione di prodotti di coltelleria, Oreste Frati fonda nel 1977 le Coltellerie FOX, unendo la passione per il prodotto all'abilità artigianale del distretto della coltelleria di Maniago promuovendo un progetto a lungo termine. Alla sua nascita questo percorso aziendale, che si sarebbe poi rivelato entusiasmante, aveva coinvolto attivamente solo Oreste e sua moglie Valnea. Sorretti dal coraggio delle loro idee e dalla forza dei loro obiettivi, FOX (dalle lettere iniziali del fondatore), apparve immediatamente un'azienda di successo. Fox Knives si è distinta per le sue idee innovative, per i materiali di prima scelta, per l'utilizzo di nuove tecnologie e per la produzione di alta qualità. Un percorso di attenzione al prodotto portato avanti oggi in un proseguo familiare, grazie al figlio di Oreste, Gabriele Frati, assieme alla moglie Claudia e alla mamma Valnea, animati da una profonda dedizione e da un continuo impegno.

La tradizione professionale, unita al costante desiderio di innovazione, ha fatto sì che la reputazione di Coltellerie FOX si distinguesse sul mercato nazionale ed internazionale, riunendo sotto il suo cappello i brand FOX, FKMD, BlackFox, FoxEdge e Due Cigni.

Ultima in ordine cronologico la sfida che ha visto nel 2020 l'accorpamento di Euro Knives Italia all'azienda Fox Knives, una liaison che ha portato a grandi investimenti, al fine di aumentare la capacità produttiva, affinare l'utilizzo di nuove metodologie e avvicinare le generazioni più giovani al mondo delle coltellerie, dando voce al forte impegno tecnologico e alla costante ricerca di soluzioni avanguardistiche.

"La capacità di esistere e crescere è profondamente legata al luogo in cui continuano a fiorire artigiani di talento in grado di lavorare ai più alti standard"

After a long experience in the production and marketing of cutlery products, Oreste Frati founded Fox Cutlery Company in 1977, combining the passion for the product with the craftsmanship of the Maniago cutlery district, promoting a long-term project.

At the beginning of this project, which would later turn out to be exciting, only Mr. Oreste and his wife Valnea were involved. Supported by the courage of their ideas and the strength of their goals, FOX (from the initial letters of the founder) was immediately a successful company. Fox Knives has been distinguished by its innovative and successful ideas, first choice materials, new technologies and high-quality products. The attention for the product has been the focus of the family for decades and today Oreste's son Gabriele Frati with his wife Claudia and mother Valnea are the ones carrying on the project.

Professional tradition combined with the constant desire of technological innovations have built up the reputation of Fox Cutlery like one of the leading company on the national and international markets, gathering the following brands: FOX, FKMD, BlackFox, FoxEdge and Due Cigni.

In 2020 the last in chronological order challenge: Euro Knives Italia merged with Fox Knives company. A liaison that has led to large investments, in order to increase production capacity, refine the use of new methodologies and bring the younger generations closer to the world of cutlery. In this way, Fox Knives gives voice to the strong technological commitment and to the constant search for avant-garde solutions.

"The ability to exist and grow is deeply tied to the place where continues to flourish talented craftsmen, which are able to work up to the highest standard"

Gabriele Frati

Con i due premi al Blade Show di Atlanta 2021 – tra cui il Knife of the Year® assegnato al SATURN – Fox supera la soglia dei dieci riconoscimenti conquistati dal 2009 ad oggi in questa manifestazione. A questi si aggiungono i due premi Red Dot conquistati recentemente. È la punta dell'iceberg di un risultato complessivo ancora più importante e di cui andare fieri: la presenza dei prodotti Fox in 58 Paesi e in cinque continenti e, soprattutto, l'alto livello di fidelizzazione dei clienti in ogni parte del mondo.

With the two awards assigned at the Blade Show 2021 in Atlanta – among which that of Knife of the Year® given to SATURN – Fox achieves the important mark of ten awards received in this event since 2009. In addition there are also two Red Dot awards that have been recently won. It represents the tip of the iceberg of an overall result even more important that makes us very proud: the presence of Fox products in 58 countries and in five continents and, most of all, the high level of customer loyalty in every part of the world.

COLTELLI CHIUDIBILI / **FOLDING KNIVES**

La categoria dei coltelli chiudibili è la più scelta dagli appassionati considerate le dimensioni ridotte e il facile porto grazie ai diversi foderi in dotazione per alcuni modelli. Con diversi meccanismi di apertura, questa categoria offre un'ampia gamma di articoli dai materiali di prima qualità ricercati con passione dai più noti designers del settore e dal Fox Knives Team con particolare attenzione e cura per i dettagli.

I coltelli Fox Knives sono prodotti Made in Italy.

The folding knife category is the most popular choice among enthusiasts considering the small size and easy carry due to the different sheaths provided for some models. With different opening mechanisms, this category offers a wide range of items from the highest quality materials passionately researched by the industry's best-known designers and the Fox Knives Team with special attention and care for details. Fox Knives are Made in Italy products.

KARAMBIT

Fox Knives offre un'ampia scelta di karambit chiudibili, fissi e da training progettati da noti insegnanti di arti marziali assieme al Fox Knives Team e realizzati con materiali di prima qualità. I karambit, di origini asiatiche, vengono utilizzati soprattutto come arma da difesa e si contraddistinguono grazie alla tipica lama a forma di mezzaluna e all'anello alla base dell'impugnatura.

Fox Knives offers a wide selection of folding, fixed, and training karambits designed by well-known martial arts teachers together with the Fox Knives Team and made from premium materials. Karambits, of Asian origin, are used primarily as a defensive weapon and are distinguished by the typical crescent-shaped blade and ring at the base of the handle.

LAMA FISSA / **FIXED BLADE**

La categoria dei coltelli fissi è la scelta per chi necessita di coltelli efficienti sempre all'altezza dei compiti più duri. I coltelli fissi Fox Knives sono realizzati con materiali di prima qualità, ricercati con attenzione da noti designers assieme al Fox Knives Team per garantire durabilità e affidabilità grazie anche allo studio dell'ergonomia che conferisce ai coltelli a lama fissa una solida impugnatura durante il lavoro.

I coltelli Fox Knives sono prodotti Made in Italy.

The fixed knife category is the choice for those who need efficient knives that are always up to the toughest tasks. Fox fixed knives are made with top-quality materials carefully researched by well-known designers, together with the Fox Knives Team, to ensure durability and reliability thanks also to the study of ergonomics that gives fixed-blade knives a solid grip while working. Fox Knives are Made in Italy products.

LINEA CLASSICA / **CLASSIC LINE**

Fox Knives vuole affondare le radici nella cultura maniaghese che vede questa Città produrre coltelli da centenni. Una collezione di coltelli per chi ama la tradizione, un compromesso tra passato e futuro che non invecchia mai grazie ai materiali pregiati e al design che rivisita le forme vintage della coltelleria.

Fox Knives wants to sink its roots into the Maniago culture that has seen this City produce knives for centennials.
A collection of knives for those who love tradition, a compromise between the past and the future that never gets old thanks to fine materials and a design that revisits vintage forms of cutlery.

MULTIUSO / **MULTI-PURPOSE**

Che sia per i piccoli o grandi lavori di tutti i giorni o nelle escursioni più avventurose, avere con sé un multiuso permette di affrontare al meglio ogni difficoltà, grazie all'ottima affidabilità ed alla qualità dei materiali utilizzati. Un'ampia scelta di usi e funzioni dedicati a diversi tipi di utenti che necessitano di un coltello che possa supportarli nelle diverse attività quotidiane.

Whether it is for easy or hardy everyday jobs or in the most adventurous excursions, having a multipurpose knife with you allows to face any difficulty to the best, thanks to the excellent reliability and the quality of the materials used. A wide range of uses and functions dedicated to different types of users who need a knife that can support them in different daily activities.

FKMD

Già dal 1982 le Coltellerie FOX iniziarono a fornire i vari reparti italiani impegnati nelle missioni di pace in Libano e, da allora, si è continuato a rispondere alle rigorose richieste dell'Esercito, dei Corpi Militari e dei Reparti d'Elite che necessitano di strumenti di supporto efficaci e qualificati. Grazie all'elevato standard qualitativo in Italia e all'estero, l'azienda è stata riconosciuta nell'albo dei fornitori ufficiali NATO con il codice N/CAGE CODE: AG180. Nel 2005 è stato creato il marchio FKMD (Fox Knives Military Division) per distinguere la produzione tattico-militare da quella civile. L'azienda è certificata ISO 9001 con personale altamente qualificato, macchinari a controllo numerico di ultima generazione, un alto contenuto tecnologico e una vasta scelta dei migliori materiali da impiegare durante le fasi di campionatura e di produzione.

Ogni specifica richiesta viene seguita in modo attento e rigoroso soddisfacendo qualsiasi esigenza.

Alcuni dei prodotti presenti nel catalogo sono codificati con il NATO Stock Number (NSN), un codice numerico a 13 cifre che identifica l'articolo inventariato dal Ministero/dipartimento della Difesa di ogni singolo Stato.

Inoltre, le Coltellerie FOX continuano a realizzare importanti progetti e forniture con le principali aziende operanti nel settore militare.

As early as 1982, FOX Cutlery began supplying the various Italian units engaged in peacekeeping missions in Lebanon, and since then has continued to meet the rigorous demands of the Army, Military Corps and Elite Units in need of effective and qualified support tools. Due to the high-quality standard in Italy and abroad, the company has been recognized in the official NATO supplier register with N/CAGE CODE: AG180.

In 2005, the FKMD (Fox Knives Military Division) brand was created to distinguish tactical-military production from civilian production. The company is ISO 9001 certified with highly qualified staff, state-of-the-art numerical control machinery, high technological content and a wide selection of the best materials to be used during sampling and production.

Each specific request is followed carefully and rigorously, satisfying any requirement.

Some of the products in the catalog are coded with the NATO Stock Number (NSN), a 13-digit numerical code that identifies the item inventoried by the Ministry/Department of Defense of each individual state.

In addition, FOX Cutlery continues to carry out major projects and supplies with major companies operating in the military sector.

NATO N/CAGE CODE: AG180

COLTELLI CHIUDIBILI / **FOLDING KNIVES**

FKMD propone un vasto assortimento di coltelli chiudibili con diversi meccanismi di apertura pensati per essere pratici e sempre pronti all'uso. Progettati con attenzione per garantire il supporto nei momenti di necessità e studiati per essere affidabili anche durante i compiti più duri.

FKMD offers a wide assortment of folding knives with different opening mechanisms designed to be practical and always ready for use. Carefully designed to ensure support in times of need and designed to be reliable even during the toughest tasks.

LAMA FISSA / **FIXED BLADE**

I coltelli FKMD a lama fissa sono il supporto necessario per le missioni e i compiti più ardui. Studiati per garantire efficienza per lunghi periodi di tempo, sono stati progettati con materiali di prima qualità. Tutta la gamma dei coltelli a lama fissa FKMD è dotata di foderi per un porto sicuro e per l'uso immediato.

FKMD fixed-blade knives are the support needed for the toughest missions and tasks. Designed to ensure efficiency for long periods of time, they are engineered from premium materials. The entire range of FKMD fixed-blade knives have sheaths for safe carrying and immediate use.

COLTELLI/ KNIVES

Black Fox è una linea di prodotti delle Coltellerie FOX dedicata a coloro che desiderano un prodotto di qualità ad un prezzo accessibile.

La linea dei coltelli Black Fox presenta un assortimento di coltelli chiudibili, con diversi meccanismi di apertura e di lama fissa studiati attentamente da noti designers assieme al Fox Knives team per soddisfare le esigenze di chi pratica attività all'aperto come il campeggio, la pesca, la caccia e per coloro che amano gli EDC dalle linee moderne.

Il marchio Black Fox è garantito grazie all'esperienza delle Coltellerie FOX che produce coltelli dal 1977.

Black Fox is a product line from FOX Knives dedicated to those who want a quality product at an affordable price.

The Black Fox line features an assortment of folding knives, with different opening mechanisms, and fixed blade knives carefully designed by well-known designers together with the Fox Knives team to meet the needs of those who enjoy outdoor activities such as camping, fishing, hunting, and for those who like EDCs with modern lines.

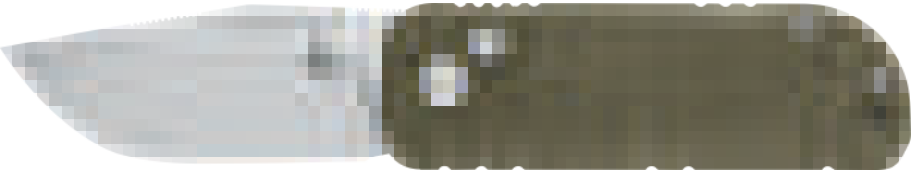

The Black Fox brand is guaranteed thanks to the experience of FOX Knives, which has been manufacturing knives since 1977.

COME AFFILARE IL VOSTRO COLTELLO FOX | HOW TO SHARPEN YOUR FOX KNIFE

Si consiglia di affilare la lama dei coltelli Fox Knives solo con prodotti di ottima qualità.

Le istruzioni da ricordare, se utilizzata una pietra o un acciaino per affilare il vostro coltello Fox Knives, sono le seguenti:

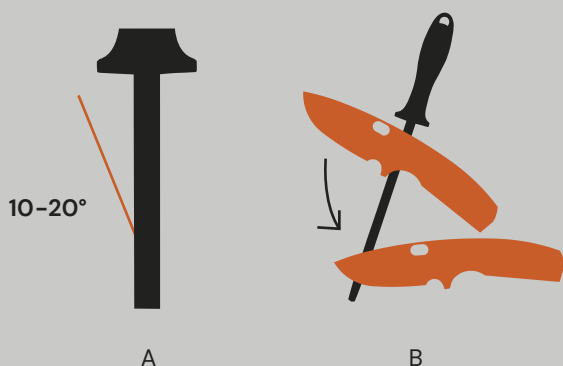

- Prima di tutto applicate dell'olio a bassa viscosità per affilatura sulla pietra naturale grezza. Quest'operazione consentirà di rimuovere velocemente il vecchio filo della lama.
- Tenendo saldamente il coltello posizionare la lama a 10-20 gradi come illustrato in figura A.
- Iniziare ad affilare partendo dalla base del coltello verso la punta come illustrato in figura B.
- Ripetere le stesse azioni anche sull'altro lato della lama.
- Ripetere i passaggi sopra citati, fino a che il nuovo filo del coltello risulti tagliente come in origine.
- Dopo l'affilatura il coltello dev'essere lavato in acqua e asciugato completamente.
- Se si desidera un filo estremamente tagliente, ripetere questa procedura utilizzando una pietra a grana sempre più sottile fino a che non sarete soddisfatti.

It is recommended to sharpen the blade of Fox Knives knives only with the highest quality products.

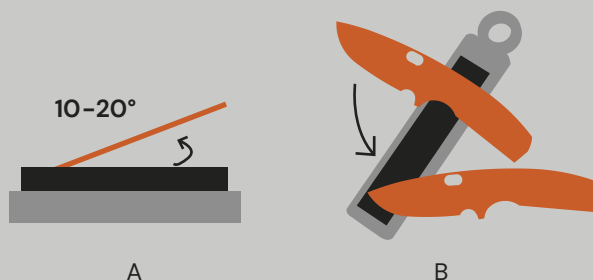

The instructions to remember, if using a stone or sharpening steel to sharpen your Fox Knives knife, are as follows:

- First apply some low-viscosity sharpening oil to the natural rough stone. This operation will quickly remove the old edge of the blade.
- Holding the knife firmly, position the blade at 10-20 degrees as shown in Figure A.
- Begin sharpening starting from the base of the knife toward the tip as shown in figure B.
- Repeat the same actions on the other side of the blade.
- Repeat the above steps until the new knife edge is as sharp as it was originally.
- After sharpening, the knife must be washed in water and dried completely.
- If an extremely sharp edge is desired, repeat this procedure using an increasingly fine-grained stone until you are satisfied.

ACCIAINO | SHARPENER

PIETRA PER AFFILARE / SHARPENER STONE

ATTENZIONE

Non affilate il coltello tenendo la lama piatta sulla pietra o sull'acciaino. Se la lama viene tenuta con un angolo troppo inclinato rispetto alla pietra o all'acciaino, il risultato è la spuntatura e l'appiattimento del filo.

Pulire la pietra o l'acciaino immediatamente dopo l'uso, con acqua corrente e asciugare completamente.

Se utilizzate altri strumenti per affilare, fate riferimento alle istruzioni del costruttore dell'apparecchio.

WARNING

Do not sharpen the knife by holding the blade flat on the stone or sharpening. If the blade is held at too steep an angle to the stone or sharpening steel, the result is bluntness and flattening of the edge.

Clean the stone or sharpening steel immediately after use with running water and dry completely.

If you use other sharpening tools, refer to the instructions of the tool manufacturer.

LEGENDA E SOMMARIO

KEY AND SUMMARY

LEGENDA - KEY

Utilizzare la legenda per comprendere nome del coltello, meccanismo di chiusura, designer, acciai e la loro durezza, finiture superficiali delle lame, materiali del manico e di altri elementi di ogni articolo.

Use the key to understand knife name, locking mechanism, designer, steels and their hardness, blade surface finishes, handle materials, and other elements of each item.

NOME/NAME | CHIUSURA/CLOSING SYSTEM - Designer

**Acciaio della lama**
Blade Steel

**Durezza scala Rockwell**
Rockwell scale hardness

**Trattamento superficiale della lama**
Blade finish

**Spessore della lama**
Blade thickness

**Materiale del manico**

FINITURE - FINISHES

Satinatura - Satin

Levigatura operata sulla lama in un'unica direzione con abrasivi di grado via via crescente. Questa operazione risalta le linee della lama e riduce il riverbero riflettente.

Sanding performed on the blade in a single direction with gradually increasing grade of abrasives. This brings out the lines of the blade and reduces reflective glare.

Sabbatura - Bead blasting

Abrasion superficiale dell'acciaio mediante un forte getto di sabbia o sfere di vetro che ne rende opaca la finitura.

Surface abrasion of the steel obtained with a strong jet of sand or glass beads which gives it an opaque finish.

Stone wash

Trattamento che produce lievi scalfitture superficiali sull'acciaio mediante impatto con pietra o ceramica. Si ottiene un effetto "invecchiato" che non compromette le qualità della lama. Questa lavorazione può essere applicata su superfici già finite con trattamenti diversi come, per esempio, l'idroglider o il PVD.

Treatment that produces slight surface scratches on steel by impact with stone or ceramic. An "aged" effect is obtained which does not compromise the qualities of the blade. This process can be applied on surfaces that are already finished with different treatments such as, for example, idroglider or PVD.

Coarse stone wash

Finitura che comprende due passaggi: una prima sabbatura effettuata con getti di corindone con cui si ottiene una finitura opaca, più scura e grezza rispetto alla normale sabbatura. Viene poi applicato lo Stone wash.

Finish that includes two steps: a first sandblasting carried out with corundum jets with which a matte finish is obtained, darker and coarser than normal sandblasting. The Stone wash is then applied.

Idroglider

Speciale rivestimento superficiale a base di PTFE molto resistente ad abrasioni e all'acqua. È possibile applicarlo in vari colori

Special non stick coating made of PTFE that ensures long life and rust resistance. It's possible to apply it in several colors.

Cerakote™

È un rivestimento superficiale a base di nano-ceramica applicato sui metalli, migliora la resistenza all'usura, all'abrasione, alla corrosione, all'urto e agli agenti chimici.

It is a ceramic based finish that can be applied to metals, enhance a number of physical performance properties including abrasion/wear resistance, corrosion resistance, chemical resistance, impact strength and hardness.

Top Shield®

Rivestimento a base di vernice ceramica che garantisce alta protezione da graffi e agenti aggressivi, offre resistenza da delaminazione fino a 450°C. Ideale per proteggere attrezzatura militare ed armi da fuoco.

Coating based on ceramic paint that guarantees high protection against scratches or aggressive agents and grants delamination resistance up to 450°C. Ideal for protecting military equipment and firearms.

PVD

Trattamento di apporto superficiale attraverso la deposizione fisica da vapore (Physical Vapor Deposition), è un metodo comune per la deposizione di film sottili sottovuoto che consente il miglioramento delle caratteristiche di utensili da taglio.

[Physical Vapor Deposition] is a variety of vacuum deposition methods used to deposit thin films by the condensation of a vaporized form of the desired film material onto various workpiece surface. The coating method involves purely physical process such as high temperature vacuum evaporation with subsequent condensation.

MIL SPEC

La brunitura dell'acciaio inox si ottiene per immersione in sali alcalini ossidanti alla temperatura di 120/130°C. Lo spessore dello strato di brunitura, costituito essenzialmente da ossidi, ha valore intorno a 0,1 micron e quindi non influenza le dimensioni dei particolari trattati.

Conforme alla specifica MIL-DTL-13924

The burnishing of stainless steel is obtained by immersion in oxidizing alkaline salts at a temperature of 120/130 °C. The thickness of the burnishing layer, essentially consisting of oxides, has a value of around 0.1 micron and therefore does not affect the dimensions of the treated parts.

Complies with MIL-DTL-13924 specification

Anodizzazione - Anodizing

Processo utilizzato su alluminio e titanio che produce uno strato di ossido (5-20 µm) il quale protegge il metallo dalla corrosione e può conferire varie colorazioni.

Process used on Aluminum and Titanium that produces an oxide layer (5-20 µm) which protects the metal from corrosion and can give several colors.

Bagno in acido cloridrico Etching with hydrochloric acid

È un trattamento applicato sulle lame in damasco atto a far emergere il contrasto chiaro-scuro tra gli strati dei diversi acciai.

It is a treatment made on the damascus blades applied to bring out the light-dark contrast between the layers of different steels.
